Report: -

these papers show much thought &  
earnestness of purpose, but not  
sufficient study of the text-books  
the answers are too much those of an  
intelligent writer trusting to intelligence  
rather than to definite study. The work of  
the course will be found very much easier  
as time goes on because the valuable habits  
of study will have been acquired.

Easter/95. These papers show a decided  
improvement upon those last sent  
in. The writer still trusts too much  
to her intuitions. Though there is  
evidence of careful study there  
are also many inaccuracies it  
would be a useful discipline  
to verify or correct each answer

Examination VI.

Physiology. a very good paper showing practice insight as well as study. But more accurate knowledge of Physiology is necessary.

Psychology - a good practical paper.  
Nature - a very interesting paper, but shows more observation than definite study.

Considering that the questions are general & range over the whole of the three years work, these papers are very well done.

always accurate. Pay. 120.8. 71.2. 125. 15.8.

These papers indicate ~~much~~  
such thorough study of each  
subject such sympathetic  
imagination as should  
fit the writer to be truly  
inspiring to her children.  
The writer should take care of  
composition to do herself  
full justice
